IMS Risk Management Training

(For Inhouse Training Only)

INTRODUCTION TO RISK MANAGEMENT TRAINING:

Risk is an “...effect of uncertainty on objectives...”

NOTE 1 An effect is a deviation from the expected — positive and/or negative.

NOTE 2 Objectives can have different aspects (such as financial, health and safety, and environmental goals) and can apply at different levels (such as strategic, organization-wide, project, product and process).

NOTE 3 Risk is often characterized by reference to potential events and consequences, or a combination of these.

NOTE 4 Risk is often expressed in terms of a combination of the consequences of an event (including changes in circumstances) and the associated likelihood of occurrence.

NOTE 5 Uncertainty is the state, even partial, of deficiency of information related to, understanding or knowledge of an event, its consequence, or likelihood.

COURSE OUTLINE:

- I. Understanding Risk
- II. ISO 9001: 2015 on Risks and Opportunities
- III. ISO 14001: 2015 on Risks and Opportunities
- IV. Principles of Risk Management
- V. Framework for Risk Management
- VI. Risk Assessment Process
- VII. Other Popular Methodologies (not listed in ISO 31010)
- VIII. Risk on Risk Management
