## ISO 9001:2015 Risk Management

*(For Inhouse Training Only)*

### INTRODUCTION TO RISK MANAGEMENT TRAINING:

This one-day Risk Management seminar-workshop is specifically designed for company in the manufacturing and or service business environment who would like to explore or have already been developing quality management system or even environmental, health and safety management system according to ISO 9001:2015, 14001:2015 and OHSAS 18001:2007 standard.

The course aims at providing you with the correct interpretation of the requirements of the ISO standard, the methods based on the process approach (PDCA) and Context of Organization as required by the ISO 9001 standard which is designed to build a better understanding of the risk-based thinking application including determining controls. The Risk Management Course guarantees

that you will learn how to conduct effective Risk Management in your own company, and be able to learn various methodology of Risk Assessment. So if you are a QMS practitioner, an internal auditor, process owner, PCO, Safety Officer, you definitely need this course in order to be competent.

### COURSE OUTLINE:

I. Understand the requirements of ISO 9001:2015 about risks and opportunities and be able to explain and interpret those requirements;

II. Understand the pre-requisites in setting-up a risk-based thinking Management System and recognize how "Plan-Do-Check-Act (PDCA)" process underpin the structure and requirements of ISO 9001:2015 and other standards.

III. Learn the skills in doing Risk Assessment.
